Joomla templates free responsive deutsch.

Each slide can include a title, description and can be linked to any Joomla! article, menu item, or other URL or even do not linked (the magnificent popup appears ). The Joomla! Slideshow extension also allows setting a start/end publishing date. Created slides can be organized in an unlimited number of slideshow categories and each category can have an unlimited number of slides. Joomla! Slideshow Features As we mentioned above. It's a fully responsive, mobile, and touch-ready Joomla! slideshow. The slideshow adapts to all screen sizes! It also offers a swipe navigation handling for touch screens. What about slider effects and slider customization options? DJ-Image-Slider brings HTML5/CSS3 transitions 9+ slide effects. Users can set a custom slide transition time, choose bulletnumber as slider indicators, and load custom slider buttons (prev/next/ and play/pause). What's more? The Joomla! slideshow comes with a huge number of useful slider features. Check more of them listed below: Easy slider backend control panel. Easy listing and adding categories (groups). Each slide can be customized. Module settings allow setting the Slider source, Slider type, slider theme, and image. The description box can be customized. full RTL support drag&drop slides ordering in the back-end cross-browser support We need to add that DJ Image Slider is an accessible slideshow component and it follows the latest Web Content Accessibility Guidelines (WCAG). It comes with compatibility with keyboard access (arrows and tab+ spacebar/enter key navigation). The accessibility is a very important issue when it comes to using the slider by people with different disabilities and older people, or those living in developing countries. Accessible slideshow is essential for many website visitors using keyboard navigation. Also, the people who are distracted by movement can pause a slideshow or if they need more time to read something, they can pause a slide, and find a while to understand the displayed content. You can enable or disable support for keyboard navigation with tab key and

arrow keys! The free slider extension offers many language translations of the slider (read below for more info) | Tutorials DJ Image Slider offers a tutorial section where users may find many articles, related to this free slideshow extension.
